5.5 Solvency ratios

Risk weighted assets and ratios under full application of Basel 3 rules

- Increase in Group solvency ratios largely due to the strong profits performance in the year as well as the benefits of the FALG sale
- UK banking licence to be relinquished in due course which will ultimately result in loss of T2 capital (€100m as at March 2016)
- Ratios are comfortably above minimum requirements imposed by Basel 3
- Management considers Merchant Banking requires additional capital beyond Basel 3
- On a pro forma basis, after the contemplated merger with Compagnie Financière Martin Maurel, the CET 1 ratio would be c.18%

- Continued increase in dividend reflecting strong growth in profitability
- Average payout % over the last 3 years of 31%
- No dividend in shares
- We are targeting a progressive dividend policy over time in order to avoid the potential negative effect of results volatility and our desire to reinvest the capital release from the FALG disposal, as demonstrated by the recent announcement of the contemplated merger with Compagnie Financière Martin Maurel
