

**Title** GA Senior Analyst / Junior Associate  
**Division** Rothschild Global Advisory  
**Location** Washington, DC

### **Team Overview**

The Washington DC and Toronto offices operate as a single Team and focus on deals in the metals and mining space. Within the sector, the Team provides advice on Mergers & Acquisitions, DCM and ECM, Restructuring and Project Finance. The Washington DC / Toronto Team is also part of the Global Metals and Mining Team and works regularly and seamlessly with other mining sector Teams across the globe (the majority of senior bankers having worked across at least 2 of our global mining offices).

Rothschild has a market leading franchise in the Americas metals and mining space, built up by Hugo Dryland, the Global Head of Rothschild's Mining Team and a Global Partner, over 20 years. The Team has a high deal volume with a low ratio of pitches to mandates and a significant volume of repeat business from long term clients. Key past and present clients include Antofagasta, Barrick Gold, Dominion Diamonds, Kinross Gold, Sherritt and Teck (amongst others).

The structure of the Team allows for significant client exposure and responsibility as well as the opportunity for frequent national and international travel – including to minesites across North and South America. The Team structure ensures that Analyst and Associate level bankers have the opportunity to work closely with the Global Head, Managing Directors and Directors on a day to day basis.

The role will be well supported with, currently, four analysts across the two offices and graduate hires in place for 2017.

### **The Role**

The role will involve work on a broad range of advisory mandates across products and clients. It is expected that this will involve the managing of multiple projects and guiding and reviewing the work of the analyst pool as well as advanced financial analysis and modelling.

### **Person Profile**

- Junior Associate or Senior Analyst
- Bachelor's degree
- Strong self-starter
- Comfortable interacting with clients and working directly with senior bankers
- Manages processes with minimal guidance
- Thrives in a fast paced work environment
- Strong technical and modelling skills to complement the technical focus of the Mining Team
- Industry knowledge is not required but we expect candidates to be able to demonstrate strong and sustained performance in their current role

### **How to Apply**

- Please submit your CV with your cover letter to [usrecruiting@rothschild.com](mailto:usrecruiting@rothschild.com).
