Rothschild & Co WM Fund (UCITS) Mosaique Equity CHF

Monthly factsheet

September 2022

Portfolio manager's commentary

Portfolio continued fall under heavy pressure with inflation yet to peak

Equity and bond markets were sold off sharply with interest rates and the economic outlook still in focus.

Following their August warnings, the European Central Bank (ECB) and Swiss National Bank (SNB) both increased rates by 0.75% and suggested similar moves in the future as the annual inflation rate in the Euro area rose to 10%. The Federal Reserve also stressed during its Jackson Hole symposium in August that rates will be higher, increasing the market's anticipation with a 75bps hike this month.

These macro headwinds continued to decelerate the portfolio's growth. Yet the partial protection through options performed exceptionally well, helping the portfolio outperform on a relative basis.

During the month, we reinforced our exposure in the healthcare sector by increasing our position in the World Healthcare ETF. This was balanced by pruning our position in the European Monetary Union ESG ETF.

For more on our latest views, please visit our **Wealth Insights** page and our Notes from the Manager update in the latest Mosaique Insights publication which is available upon request.

Remarks

• The ESG track record and the MSCI ESG Rating measure how well a company performs on environmental, social and governance issues compared to other companies (peers) in the same industry. The importance of the 3 different factors varies by industry. Companies with a below average ESG track record / MSCI ESG Rating are considered riskier since they are more likely to be impacted by factors such as controversies, new social and environmental regulations, bad reputation, litigation risk, poorly motivated work force and financial mis-management.

• The Carbon Exposure Risk measures the probability and severity that a company is negatively impacted by climate change. Climate change exposure can be physical, for example through extreme heat or flooding, policy related, for example through the introduction of a carbon tax, or technological, for example through through competitors developing greener products. The risk is a function of the company's exposure to climate change and of how well the company is managing that exposure.

• The CO2e Sales Intensity measures how much CO2 equivalents are emitted by a company per USD 1 million sales in the most recent reporting year as reported by MSCI ESG Research. The emissions are direct emissions generated by sources owned or controlled by the company and those from the generation of purchased energy.

The ESG distributions in the charts exclude money market and derivative positions such as foreign currency forwards.

Important information

All performance data refers to share class XI ACC.

Source: Rothschild & Co and Bloomberg

Sharpe ratio: Sharpe Ratio is the statistical measure of excess portfolio return over the risk-free rate relative to its standard deviation.

Annualized Volatility: Annualized Volatility is the measure of return dispersion for an asset over twelve month since inception.

Maximum Loss: This is the largest monthly drop in the portfolio's value during a given period. It is expressed as a percentage and reflects the fall in value during the time between the draw down peak (highest value) and the drawdown valley (lowest value).

This document is issued by the Rothschild & Co WM SICAV SIF, a société anonyme incorporated under the laws of Luxembourg, on a strictly confidential basis to a limited number of potential investors, being "wellinformed investors" pursuant to the Luxembourg Law of February 13, 2007 relating to specialized investment funds, as amended (the "SIF Law"), who have indicated their potential interest for the R Wealth Management Fund. This document does not constitute a personal recommendation or an offer or invitation to buy or sell securities or any other banking or investment product.

Further information and risk warnings on this Fund or other share classes or sub-funds of the SICAV-SIF may be found in the issue document, in the articles of association, in the annual report of the SICAV-SIF. The SICAV-SIF is subject to Luxembourg tax law. This may affect your personal tax situation. The value of investments, and the income from them,can go down as well as up, and you may not recover the amount of your original investment. Past performance should not be taken as a guide to future performance. Where an investment involves exposure to a foreign currency, changes in rates of exchange may cause the value of the investment, and the income from it, to go up or down.
