This is not a promotion or solicitation of the Rothschild & Co WM SICAV SIF – Mosaïque Conservative EUR, which is not usually available to execution only or advisory clients. When certain criteria are met discretionary portfolios may hold the Fund, but only at Rothschild & Co's discretion.

Values: All data as at 30th September 2023. Sources of charts and tables: Rothschild & Co and Bloomberg, unless otherwise stated. Past performance is not indicative of future performance and investments and the income from them can fall as well as rise. Fund performance is shown in Euros, after all fees, in total return, combining income and capital growth. Returns may increase or decrease as a result of currency fluctuations.

Please ensure you read the Important Information section at the end of this document.

Fund manager's review

With inflation fading around the world, central banks paused their interest rate hikes although suggested they would probably remain higher for longer. Financial markets continued to adjust to this new environment, and were optimistic that most major economies are likely to avoid recession or suffer only a mild contraction.

PORTFOLIO PERFORMANCE

Following the strong first half of 2023, where equities were rallying, chiefly due to the 'magnificent seven' largest US technology-related stocks, this quarter was volatile in comparison as markets digested central banks' 'higher for longer' interest rate rhetoric, surging oil prices and renewed stress in the Chinese property market. Furthermore, while the positive market sentiment demonstrated in the first half of the year continued in July, it reversed sharply through August and September.

Also, over the quarter the market responded more favourably to the pure cyclical sectors, Energy and Financials, whereas companies demonstrating high-quality characteristics underperformed. Nevertheless, our investment preference for companies with these high-quality characteristics has been the strongest performer over the year despite this recent setback.

Furthermore, having observed the stock market rally away from the October 2022 lows and with company valuations remaining inexpensive during the second quarter earnings output, we restored the Equity allocation from neutral to overweight by reducing liquidity.

Amidst the volatility, stock selection was the main performance driver for the portfolio. Among single stocks, Totalenergies (+20.0%) gained as part of the Energy rally, with the sector up 11.5% this quarter. Moreover, the market welcomed the oil and gas producer's earnings report, which revealed that it will provide shareholders a return of more than 40% of its cash flow in 2023. Alphabet (9.3%) announced that their strategic partnership with Salesforce will grow. The generative AI

assistants from both companies – Google's Duet AI and Salesforce's Einstein Copilot – will allow users to collaborate across platforms in the future. This should help the Google Workspace software tools and the application opportunities, processes and productivity of Salesforce's CRM products.

Additionally, in Telecommunications, Comcast (7.3%) grew by virtue of better-than-expected quarterly earnings and headlines surrounding their media and entertainment business. The company's theme park and studio divisions have been operating profitably and talks to sell their 33% share in Hulu to Disney, which controls 67% of the streaming service, are now in progress.

The detractors, all declining by double digits, were LVMH and ASML. For the former, the overall consumer discretionary sector was negative with worries over the impact rising interest rates will have on consumers' disposable income. In ASML's case, as it benefited from the semiconductor wave during the first half of the year, the industry seems to be in a corrective phase now with suspected profit taking by short-term investors.

In Fixed Income, we closed a long-standing underweight in the asset class to neutral, also from liquidity. Yet we still maintained the preference for high-yield credits over government bonds. The portfolio benefited from its current duration positioning with carry providing a bigger cushion against rate hiking. We continue to remain defensive in our investing strategy by searching for high-quality and shorter-duration issues in this market environment.

Fund manager's review (continued)

PORTFOLIO ACTIVITY

Starting in July, we continued our transition to balance risk with opportunity by exiting the position in Alibaba in favour of the capital protected structured product on the CSI300 and CSI500 that was added last quarter. As this product allows us a risk-optimized and diversified exposure to China, we believe it no longer necessary to take single-line risk to gain exposure to the region. We also took profit by reducing London Stock Exchange following a good run up in the stock price. Additionally, we purchased Novo Nordisk. The company has been among the best performing shares in the Pharma industry driven by strong operational execution, a robust balance sheet, and exceptional investment outlook. Roche was sold to finance the trade. When weighing the two companies, we consider Novo Nordisk the stronger as it exhibits a clear improvement in business quality, end market exposure and margin improvement potential. We were instantly rewarded with the purchase as it was one of the clear winners this quarter (+17.7%). Initially, the results from its Wegovy trial showed that the weight-loss medication lowers cardiovascular risk by 20% in overweight or obese people, with a history of heart disease. Additionally, the pharmaceutical firm raised its full-year outlook and to reflect the strong share price performance they performed a 1:2 stock split in September.

In August, as the Equity allocation was increased to overweight, we started by using liquidity to purchase the MSCI ACWI ETF. Next, we added to our Amazon position, as they reported better-than-expected quarterly profits, with earnings nearly doubling analysts' projections. In fixed income, the heightened level of macro risks confronting global bond markets prompted us to diversify our exposure to Emerging Market sovereign debt. We switched half of our investment in the Vontobel Emerging Markets Debt Fund into the Vanguard Emerging Markets Bond Fund. The Vanguard fund has a lower tracking error in its investment approach due to fewer off-benchmark positions, as well as a good risk management procedure, which is consistent with our evaluation of EM bond markets.

Finally in September, we added to the existing suite of healthcare names by introducing Intuitive Surgical to the portfolio. The company sells surgical robots, instruments and service plans, with a 98% market share for the former. The addition allows for capitalising on the growing demand for advanced medical technology and positions the portfolio well for potential future growth opportunities in the sector.

Fund performance

At the end of the third quarter 2023, the performance stood at 0.3% QTD and 4.5% YTD.

Notes

At Rothschild & Co Wealth Management we offer an objective long-term perspective on investing, structuring and safeguarding assets, to preserve and grow our clients' wealth.

We provide a comprehensive range of services to some of the world's wealthiest and most successful families, entrepreneurs, foundations and charities.

In an environment where short-term thinking often dominates, our long-term perspective sets us apart. We believe preservation first is the right approach to managing wealth.

Important information

All performance data refers to share class Acc X.

Source: Rothschild & Co and Bloomberg

Sharpe ratio: Sharpe Ratio is the statistical measure of excess portfolio return over the risk-free rate relative to its standard deviation.

Annualized Volatility: Annualized Volatility is the measure of return dispersion for an asset over twelve month since inception.

Maximum Loss: This is the largest monthly drop in the portfolio's value during a given period. It is expressed as a percentage and reflects the fall in value during the time between the draw down peak (highest value) and the draw down valley (lowest value).

This document is issued by the Rothschild & Co WM SICAV SIF, a société anonyme incorporated under the laws of Luxembourg, on a strictly confidential basis to a limited number of potential investors, being "well informed investors" pursuant to the Luxembourg Law of February 13, 2007 relating to specialized investment funds, as amended (the "SIF Law"), who have indicated their potential interest for

the Rothschild & Co WM SICAV SIF. This document does not constitute a personal recommendation or an offer or invitation to buy or sell securities or any other banking or investment product.
